- The QT-80- Retro underwater Light LED heatsink can be fitted into existing small Bulleyts Type A or the ULTIMATE 80 range of underwater lights, Type B, allowing an easy upgrade to LED without changing the hull fitting or hauling the boat.
- The QT-80-Retro LED is available with a 40w LED and 7000 lumens or with the 20w LED with 3500 lumens. The LEDs are available in white and blue with a beam angle of between 60 and 100 degrees through a flat lens providing a perfect spread of light..
- Installation requires no modification to class approvals and fitting these fixtures can take as little as one hour to totally transform an existing underwater lighting setup.
